Sto	You are competing in a basketball contest. In this contest the score for each successful shot depends on both the distance from the basket and the player's position. The ball is shot N times, successfully. You are given an array A containing the distance of a	28 F1853
	player from basket for it shots. The index of array represents the position of the player, score is calculated by multiplying the	50
8 KJ823C	position with the distance from the basket.	105
0	Your task is to find and return an integer value, representing the maximum possible score you can achieve by choosing a contiguous subarray of size K from the given array.	82300
003	Note:	7.
323C5E006	* A subarray is a contiguous part of array.	56008 KU
,	* Assume 1 based indexing.	SEOU
atur	* The array contains both negative and positive values.	٥, د
,£008 t	* Assume the player is standing on a cartesian plane.	, KUB23C
	Input Format	, +
*N823C5	- input1 :An integer value N representing the number of shots made by the player	30
4	- input2 : An integer K representing the size of subarray	13C5E008
